

4 March 1965

MEMORANDUM FOR THE RECORD

SUBJECT: Activities of [REDACTED], Office of Logistics, STAT
with the Joint Committee on Printing and Related Matters

1. Contact within Committee: When Mr. James L. Harrison, now the Public Printer, headed the staff of the Joint Committee on Printing, he was briefed prior to every major purchase. This was done as a matter of professional courtesy and information with afore-knowledge that in all probability he would anyway soon learn of such purchase from other sources. This was in no way interpreted by either Harrison or ourselves as delimiting our authority under P. L. 110 to make purchases. When Mr. John F. Haley acceded to Harrison's position, the same approach was used but on the first such contact Haley (probably because of the newness of his position) asked that [REDACTED] commit the matter to writing. As a result, STAT
[REDACTED] no longer pre-advises Haley but rather meets with him about twice a year to bring Haley up to date on our printing activities in a general way. This procedure has worked out well and Haley has not asked for written memoranda. The result is that [REDACTED] has STAT
infrequent contact with Haley in his capacity with the Committee.

2. Printing Building: Mr. Harrison and Mr. Haley were both less than happy that the printing facilities were edged out of their initial location at Langley, echoing [REDACTED], et al, claim that it was a dubious security practice to tranship so much classified material from various points. Both Harrison and Haley have been strong advocates, along with Colonel White, for the new printing plant at STAT
Langley. [REDACTED] says the architect is now finalizing the plans and

STAT
STAT
everything is running smoothly with hopes for a starting construction date of August 1965 and completion the following year. The present plans carry a [] overrun and they are cutting to stay within the residual figure. The building will give them a little less than the [] square feet which was originally allotted to them in the Headquarters building. However, because of advances being made in the entire printing process from an ADP angle, it is conceivable that they will need less room for the printing presses in the short term future than they need now. Of course GSA has not yet let out the bid on the building.

STAT
3. Publicity: As I had often heard, our printing people seem to be constantly achieving technical breakthroughs in the printing field. This week the professional society of printers held a convention in Washington, and a [] one of [] people, delivered a professional paper with CIA attribution. This related to a programming breakthrough on ADP printing which would be of widespread interest among the trade and profession. The accomplishment related to one of the \$64 problems in this area: How do you program a machine to do hyphenation without having to read the entire dictionary into the machine? The answer is simply that you program the machine to either stretch out or contract words so that the line, with proper end-margin, ends with a complete word. [] said they realized that this may cause publicity and they were prepared to answer questions and wanted to share this knowledge.

4. General: [] said that whenever he had anything of consequence to report to us he would continue to do so, as he has in the past. I did not ask him to keep us currently informed on all major actions with respect to the building, not knowing whether that was what Mr. Warner wanted and unsure of my grounds for levying such a requirement, viz creating undesirable waves with Colonel White. If it is our desire to be kept informed, I will advise [] of this fact.
